SUMMARY

Business Intelligence Analyst with 4 years building enterprise Power BI reporting solutions across finance, supply chain, and operations functions. Skilled in DAX, Power Query, and star-schema data modelling, with a track record of deploying governed, high-performance dashboards to the Power BI Service.

SKILLS

DAX, Power Query (M), Data modelling / star schema, Power BI Service & Gateway, SQL, Stakeholder reporting, Power BI, Tableau, Data warehouse design principles, Data governance, Git, Microsoft Certified: Data Analyst Associate, Data storytelling

EXPERIENCE

Senior Power BI Analyst — Arvind Group (Finance & Supply Chain Analytics) (2023 - Present)

- Own end-to-end development of Power BI reports and dashboards for finance, supply chain, and operations stakeholders
- Build complex DAX measures and calculated tables; design star-schema data models ensuring data integrity
- Configure Power BI Service & Gateway for scheduled refresh, row-level security, and workspace governance
- Partner with data engineering to optimize data warehouse queries (SQL) feeding BI models
- Mentor junior analysts and review their dashboards against best-practice standards

Power BI Analyst — Meridian Retail Analytics (2021 - 2023)

- Delivered stakeholder-facing reports using Power Query (M) for transformation and DAX for analysis
- Presented data storytelling sessions to non-technical business stakeholders
- Used Git for version control of report source files and documentation

EDUCATION

B.Tech in Computer Science, Nirma University, Ahmedabad (2021). Microsoft Certified: Data Analyst Associate (2022).
